
ENVIRONMENTAL POLICY

Dellner strives to be the world leader in the design, manufacturing and maintenance of train connection systems. Dellner has adopted an Environmental Policy, that forms the basis and guidance of all environmental activities within the organization.

From the policy and its adaption, design, transports and energy usage have been identified as aspects that affects the environment; following points are our promise:

- We will work to minimize the impacts and prevent pollution to the environment from our products and our processes.
- We will work to minimize energy usage, scrap, pollutant and waste.
- We always, as a minimum will follow applicable laws and demands from relevant authorities and our customers.
- We will work internally in order to promote environmentally accepted products and environmentally accepted processes.
- We will work with continual improvements in order to protect and prevent environment from being affected by our products and/or processes.

In order to achieve the objectives of our environmental policy, management has established the environmental requirements and goals and maintains an effective follow up programme to evaluate achievements and results.

These factors give us the possibility to make environmentally good products and use best environmental practices.
