
ENVIRONMENTAL POLICY

Dellner strives to be the number one global supplier of safe and high-quality Train Connection Systems and Services, supporting the most environmentally friendly way of travelling.

Dellner Environmental Policy form the basis and guidance of all environmental activities within the organization. The requirements of this Policy apply to all Dellner subsidiaries and employees.

From the policy and its adaptation; supply chain activities, chemical management, transport of people and goods, use and origin of energy and waste management have been identified as our most significant aspects affecting the environment. Through active and systematic environmental work, Dellner will contribute to lasting sustainable development.

- We continuously work to minimize waste and emissions of our operations and to increase recycling of materials. We commit that 90% of our total waste globally shall be sorted to enable recycling 2026
- We shall strive for effective consumption of energy, water, raw materials and other natural resources, wherever possible we use energy from renewable sources. We commit to ensure 100% renewable electricity throughout our organization.
- We strive towards eco-friendly design by choosing the best viable environmental alternatives in material and design with the ambition to limit the environmental impact of our products throughout their life cycles from development, manufacture and use to final processing and disposal.
- We endeavour design of our products to enable customer operation and maintenance to be carried out in a safe, healthy and environmentally friendly way.
- We map our greenhouse gas emission footprint and take action towards minimizing its amount. Dellner commits to 76% absolute reduction of scope 1 & 2 GHG emissions and at least 27,5% absolute reduction of scope 3 GHG emissions by 2030 from a 2019 base year.
- We will comply to or exceed applicable laws and demands from relevant authorities, our customers and other stakeholders.
- We train and inform our employees on environmental issues and get them involved in our pursuit of continuous improvement of our products and processes.

- We expect our suppliers to adopt the principles of this policy and include this as a criterion in our supplier selection process.

To fulfil this policy, all our employees are committed to continuously improving our processes and delivery of products by implementing measurable objectives which is regularly followed up in our KPI-reviews, resulting in environmentally good products and use of best environmental practices.
